

Thinking Global

This two-year Department for International Development (DFID) funded project aims to use the Philosophy for Children (P4C) methodology as a means of developing pupils thinking and learning about global issues. 20 schools from across the region have become part of the '**Thinking Global**' project (for details see below).

Through regular network meetings and provision of key global P4C stimuli the project aims to develop teachers' confidence to address development and controversial issues and raise pupils' awareness.

Project Schools:

Belgrave Primary School
